To Whom It May Concern:

Recently, a friend of mine gave me your address and told me of the series of books you have on the JFK assassination (the Whitewash series and one book called Post Mortem: JFK Assassination Coverup Smashed). I am doing research on the assassination and there is a possibility of a class on the assassination in the near future. Could you please bill me and send me copies of the books mentioned above to the following address:

Thank you very much for your time and consideration.

Sincerely,

Dear Mr. Betz,

In response to your letter of 4/29 I enclose a list of our books.

Your reference to the "possibility of a class ^{on the assassination} in the near future is ambiguous.

It does not indicate whether you would be a student or the teacher.

If the teacher I urge you to make the right kind of inquiry before you start teaching because most of the available books are not non-fiction.

Without any exception I regard those that advance conspiracy theories in the form of solutions as faulted, with varying degrees of seriousness.

and buying anything else in a book store is close to impossible.

So it is almost impossible without major effort and much time to ascertain what writing is factual and what isn't.

Sincerely,

Harold Weisberg
